

PROBLEM STATEMENT1

Create and display an order detail list for any 4 items which will include the product name, product description, price and quantity. When an onClick event is triggered on a button the quantity has to increase and the total cost has to be calculated and displayed with the update of items quantity.

For styling: Add styling by creating a style object variable the same way as we create a JavaScript.

OBJECTIVE

The objective of this exercise is to test the student on front end frame work React JS. It evaluates the student's knowledge React Js components, ReactJS props and state, ReactJS Lists and Keys, React JS events

PREREQUISITE

In order to complete this exercise, the student needs to understand the fundamentals of HTML,CSS, and JavaScript
